

Energizing California's Communities with Renewables: A North State and Rural Perspective

City of Redding Community Room
777 Cyprus Avenue, Redding, CA 96001

September 21, 2015

2:00 p.m. – 4:00 p.m

Michael Sokol

Energy Research and Development Division

California Energy Commission

Michael.Sokol@energy.ca.gov

916-327-1416

Today's Agenda

- 2:00 – 2:05 Welcome and Introductions – California Energy Commission
- 2:05 – 2:20 Overview of Energy Commission Efforts and Resources – Mike Sokol, Energy Commission
- 2:20 – 2:35 Case Study Presentation #1 – Jonathan Kusel, Sierra Institute
- 2:35 – 2:50 Case Study Presentation #2 – Jim Zoellick, Schatz Energy Research Center
- 2:50 – 3:05 USDA Presentation on Local/Statewide Programs (Invited)
- 3:05 – 3:15 Utility Presentation on Local Programs – Pacific Gas and Electric (PG&E)
- 3:15 – 4:00 General Q&A and Public Discussion

Goals of Today's Workshop

- Overview of community-scale renewable energy and past programs at the Energy Commission
- Summarize high-level conclusions and lessons learned from prior projects
- Highlight opportunities for community-scale renewable energy projects through the Electric Program Investment Charge (EPIC) and other funding sources
- Engage attendees in a discussion on how to better target future funding opportunities and increase community engagement

Commitment to Diversity

The Energy Commission adopted a resolution strengthening its commitment to diversity in our funding programs. We continue to encourage disadvantaged and underrepresented businesses and communities to engage in and benefit from our many programs.

To meet this commitment, Energy Commission staff conducts outreach efforts and activities to:

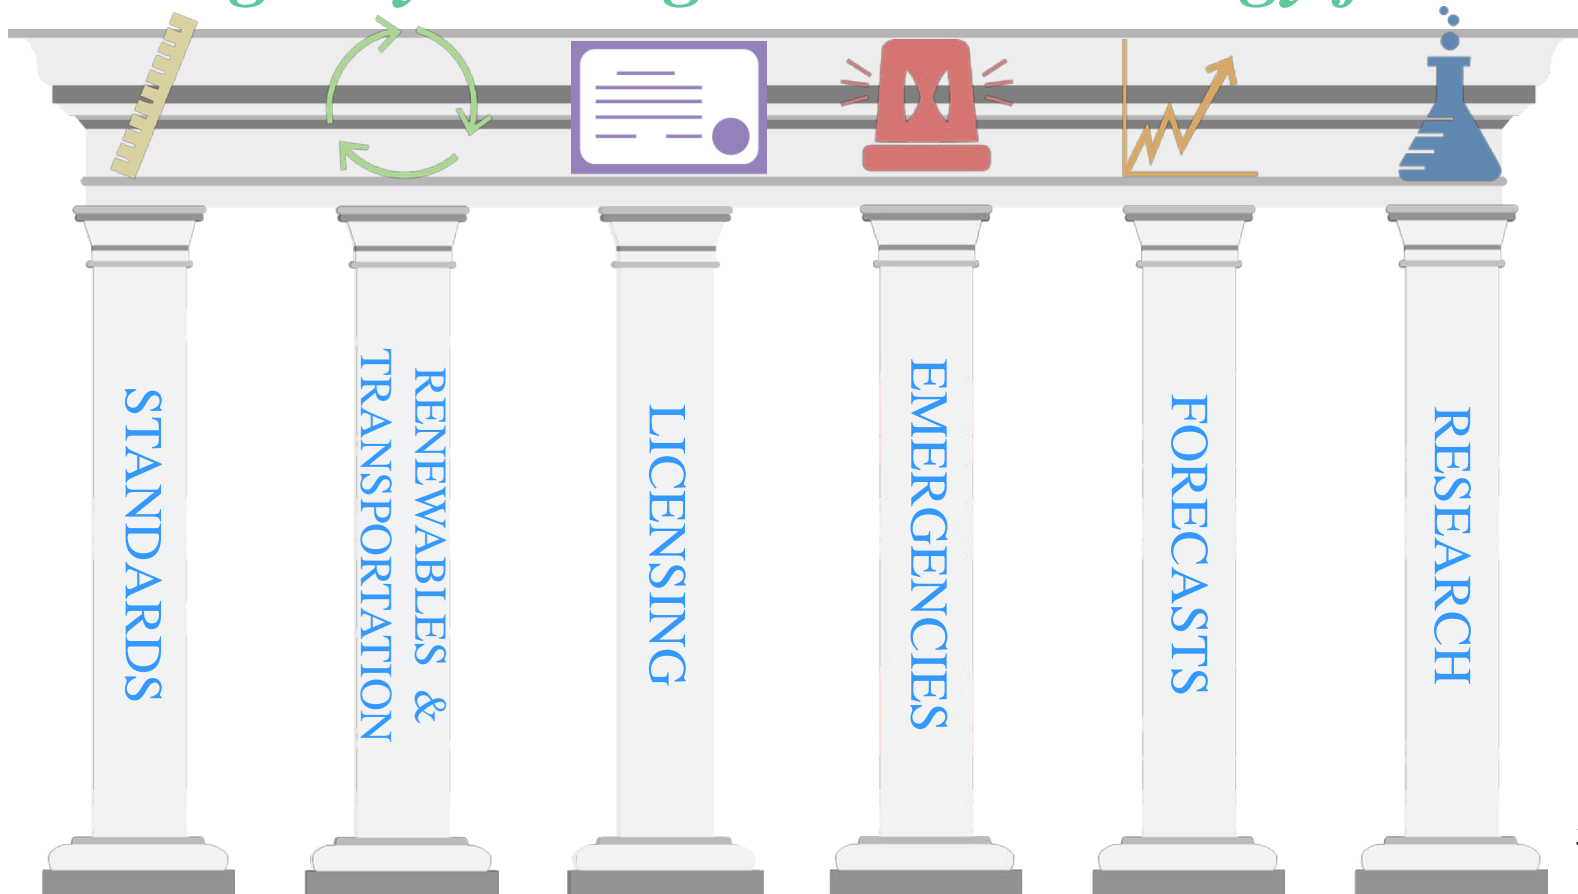

- Engage with disadvantaged and underrepresented groups throughout the state.
- Notify potential new applicants about the Energy Commission's funding opportunities.
- Assist applicants in understanding how to apply for funding from the Energy Commission's programs.
- Survey participants to measure progress in diversity outreach efforts.

About the Energy Commission

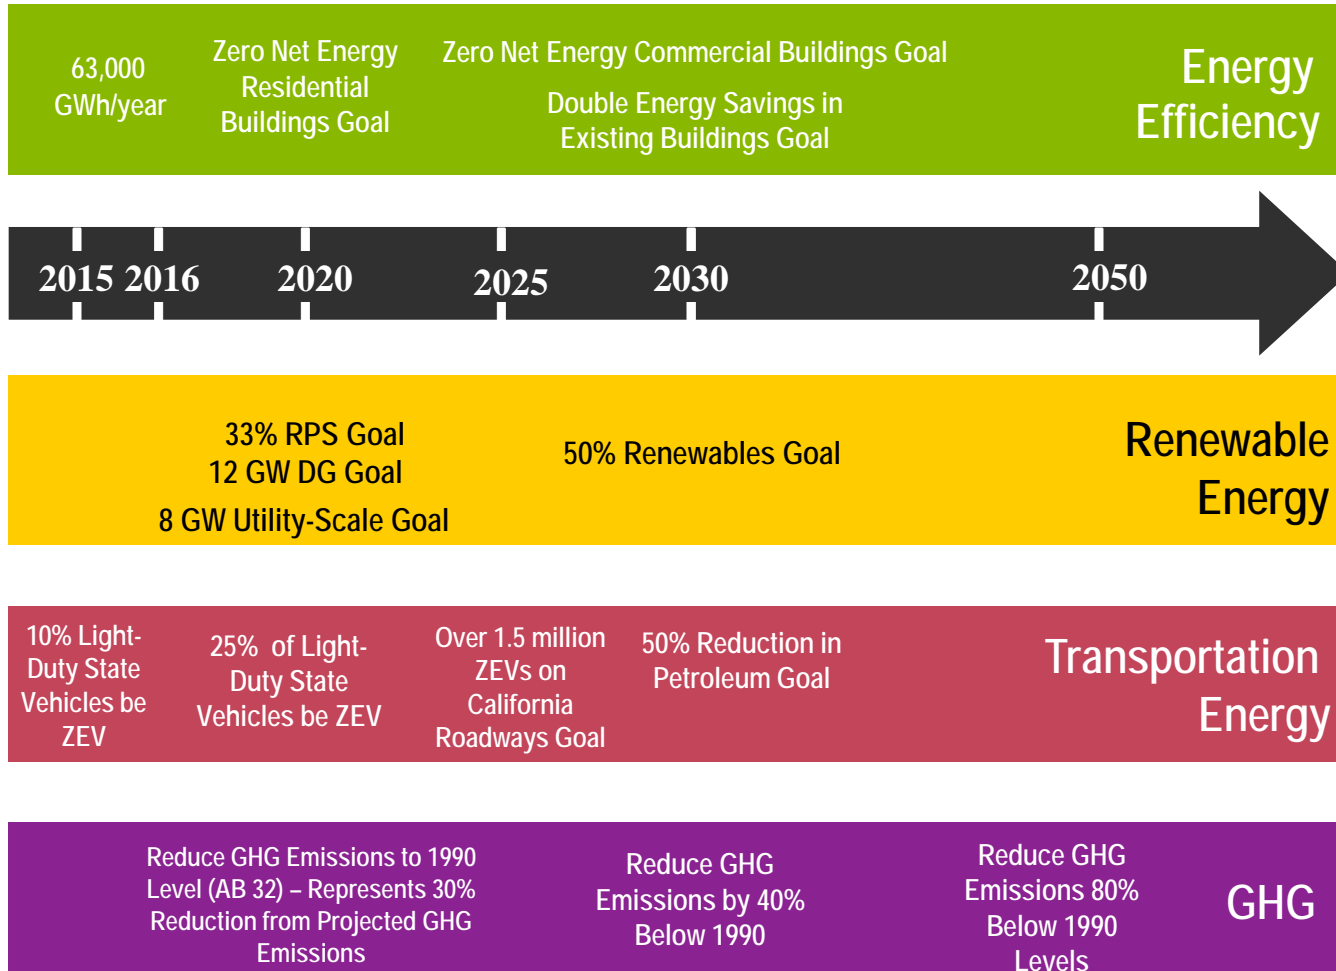

~~Intelligence~~

The agency driving our clean energy future

State Energy Policy Drives Energy RD&D Investments

History of Public Interest Energy Research (PIER)

- Funded RD&D projects to develop energy technologies that provide:
 - increased environmental benefits,
 - greater system reliability, and
 - lower system costs.
- Over \$911 million encumbered from 1997 - 2014

Electric Program Investment Charge (EPIC)

- Established by CPUC in 2012 to fund investments to advance clean energy technologies and approaches for the benefit of investor-owned utility electricity ratepayers.
- The Energy Commission administers approximately \$130 million per year.
- EPIC uses an **energy innovation pipeline** approach to creating new energy solutions, fostering regional innovation, and bringing clean energy ideas to the marketplace

Supporting Evolution of the Electricity Grid

Historical Grid

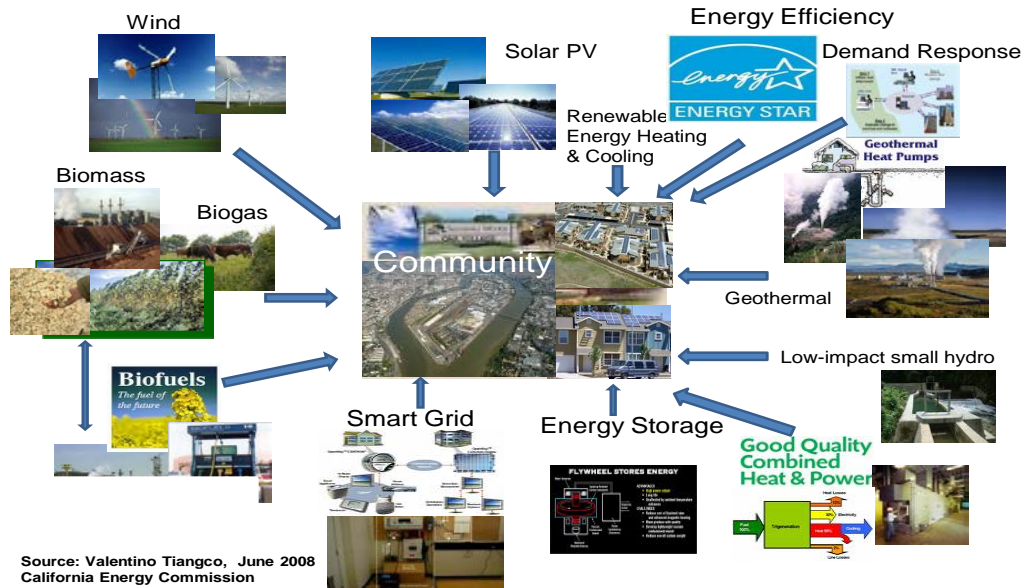

“Smart” Grid

Community Scale Renewable Energy Research, Development, and Demonstration Overview

Building Blocks of Renewable-based Energy Secure Communities (RESCO)

Source: Valentino Tiangco, June 2008
California Energy Commission

- 11 projects from 2008 solicitation
- 10 projects from 2012 solicitation
- Total awards over \$18 million
- Attracted over \$23 million match
- Follow-on interest and funding from numerous parties
- EPIC program aims to pick up where PIER left off

- Communities that secure their primary energy supply through locally-available renewable energy resources and community-wide energy management strategies
- PIER funding awarded under two separate solicitations
 - 2008 Renewable Energy Secure Communities (RESCO)
 - 2012 Community Scale Renewable Energy Development, Deployment, and Integration (REDDI)
- EPIC continues funding for this community scale renewable energy approach

Energy Commission Programs as a Catalyst for Distributed Generation in California

Source: Energy Commission Staff Analysis (2015)

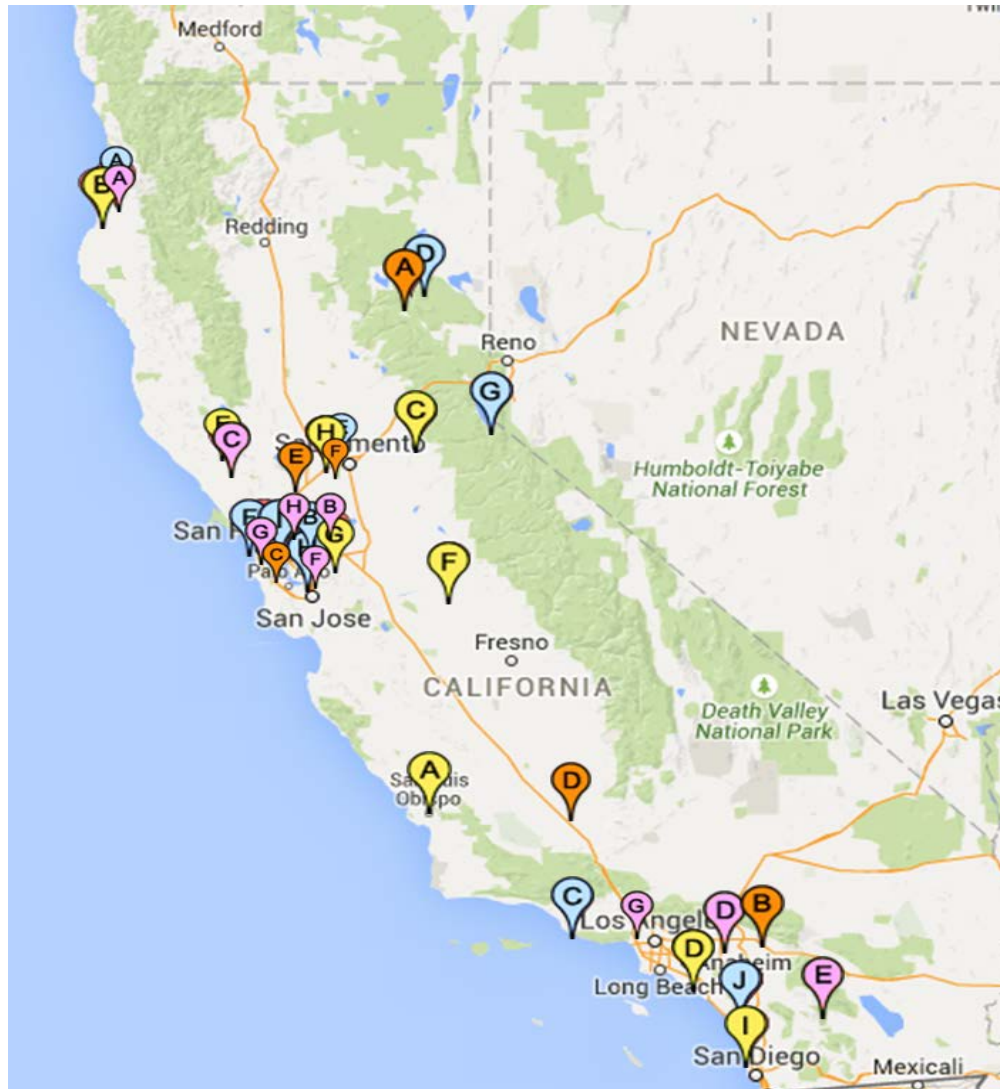

Definition of “Community” is Diverse

- Commercial business parks
- Industrial campuses
- Urban neighborhoods
- Suburban neighborhoods
- Shopping centers
- Rural communities
- Military complexes
- Institutional/municipal facilities
 - E.g. Hospitals, prisons
- College campuses
- Mixed-use communities
- Others not included here

Geographic and Resource Diversity

PIER Solicitation PON-12-502

PIER Solicitation PON-08-004

EPIC Solicitation PON-14-301

EPIC Solicitation PON-14-307

Localized Renewable Energy Issues

- Each region and community has unique characteristics
 - Climate Zones
 - Daily Demand Profiles
 - Seasonal Demand Profiles
 - Localized Renewable Resources
 - T&D Limitations
 - Air Basins/Air Districts
 - Siting Constraints
 - Utility Territories
 - Other Factors

The North State's Energy Profile

- Abundant woody biomass resource
- Remote, isolated communities provide ideal locations to build out distributed generation
- Ample opportunity to use local timber and other wood waste for bioenergy production
- Alignment with fire hazard reduction goals
- Sustainability is key

Need for Greater Renewable Energy in the North State

- Thousands of dollars in electricity bill savings through local energy projects
- Local jobs and economic development with community-scale renewables
- Increase local resiliency to emergency scenarios and climate change
- Improve customer safety through fire hazard reduction and improved air quality

CalEnviroScreen North State Results

CalEnviroScreen 2.0 results

- *Relative* scores assigned based on pollution, socioeconomic, and underlying health impacts
- 2.0 Implemented by Cal EPA in October 2014
- Energy Commission has used as eligibility criteria in recent solicitations

More info at:

<http://oehha.ca.gov/ej/ces2.html>

A Few Observations and Conclusions

- The North State region and each city is endowed with unique resources and decision-making structure that require customization for energy models, etc.
- It takes a large coordinated effort from a multi-stakeholder team to conduct meaningful analysis for planning efforts
 - Local Government, Academia, Industry, Utilities
- Developing an integrated plan is the first step on the road to success
- Engage stakeholders early and often to build project support
- Pursuing community renewables can help achieve other local goals, such as GHG emissions, job creation, and possibly drought mitigation
- Local energy plans need to account for legacy infrastructure, existing contracts and rules, and stakeholder interests
- Technology innovation is still needed in this area in order to maximize the benefits of local renewable energy

Technical Innovation is Still Needed!

- Smart Microgrid Controllers
- Advanced Bioenergy Technologies
- Smart Inverters for High Penetration Solar
- Zero-Net Energy/Carbon Communities
- Master Community Planning for Carbon Reduction
- Forecasting and Prediction of Grid Conditions
- Electric Vehicle Integration
- Community Scale Energy Storage Solutions
- Streamlined Planning and Permitting

EPIC Continues to Fund Solutions

- EPIC Microgrid Demonstrations

- Critical Facilities
- High-penetration renewables
- Grid-linked Electric Vehicles

See awards at: http://www.energy.ca.gov/contracts/PON-14-301_NOPA_revised_2.pdf

- EPIC Community Scale Renewable Energy Demos

- Integrated community energy management strategies to reduce peak demand and costs, and maximize benefits
- Targeted for disadvantaged communities

See awards at: http://www.energy.ca.gov/contracts/PON-14-307_NOPA_Amended.pdf

Anticipated 2015 EPIC Solicitations

Solicitation Title	Program Area/Strategic Objective	Estimated Funding Amount
Conduct Energy Research Gap Assessment and Roadmapping	Applied Research and Development (S10)	\$3 million
Reduce the Environmental and Public Health Impacts of Electricity Generation and Make the Electricity System Less Vulnerable to Climate Impacts: Phase II	Applied Research and Development (S5)	\$8.5 million
Sustainable Energy Entrepreneur Development (SEED) Initiative	Applied Research and Development (S10)	\$16 million
Regional Energy Innovation Clusters	Applied Research and Development (S10)	\$8 million
Clean Energy Research, Technology Showcase, and Policy Forums	Market Facilitation (S18)	\$1 million
Measuring Innovation Progress to Guide Future Investment	Market Facilitation (S18)	\$1 million
Establish Strategies for Enhanced Local Regulatory Assistance and Permit Streamlining that will Accelerate Deployment of Clean Energy	Market Facilitation (S16)	\$17.3 million
Connecting Emerging Technologies and Strategies to Market Needs and Opportunities	Market Facilitation (S18)	\$3 million
Developing Technologies, Tools, and Strategies to Enable the Smart Grid of 2020	Applied Research and Development (S6)	\$8 million
Guiding Future Energy Needs, Plans, and Programs through Commercial End-Use Surveys	Market Facilitation (S18)	\$8 million
Reducing Costs for Communities and Business Through Integrated Demand-Side Management and Zero-Net Energy Demonstrations	Applied Research and Development (S1)	\$3 million
	Technology Demonstration and Deployment (S12 & S14)	\$20 million
Developing New Technologies and Applications that Enable cost-beneficial Customer-Side -of-the-Meter Energy Choices	Applied Research and Development (S2)	\$16.4 million
Developing a Portfolio of Advanced Efficiency Solutions (Phase 2)	Applied Research and Development (S1)	\$7 million
Developing Operational Tools, Models, and Simulations to Improve Grid Resource Planning	Applied Research and Development (S7)	\$TBD

Current Opportunities Under EPIC

Regional Energy Innovation Clusters:

<http://www.energy.ca.gov/contracts/epic.html#GFO-15-306>

- \$20 million available to provide services and resources at the regional level to assist entrepreneurs in bringing energy innovations to market.

Sustainable Energy Entrepreneur Development (SEED) Initiative:

<http://www.energy.ca.gov/contracts/epic.html#RFP-15-306>

- \$33 million available to develop and implement a new initiative providing technical and financial support to energy entrepreneurs.

Connecting Emerging Energy Technologies and Strategies to Market Needs and Opportunities: <http://www.energy.ca.gov/contracts/epic.html#RFP-15-304>

- \$7 million available to fund market intelligence, analysis, and expertise to support the commercial success of emerging energy technologies.

Upcoming Funding Opportunities

- In Q4 2015, the Energy Commission plans to release a solicitation that will fund a two phase competition that will challenge project teams to develop innovative and replicable approaches for accelerating the deployment of Advanced Energy Communities.
- Phase I will focus on Planning and Permitting Advanced Energy Communities.
- Phase II will fund an Advanced Energy Community Build-out.
- Draft is available here (comment period is over):

http://www.energy.ca.gov/research/notices/2015-07-29_request_for_draft_grant_funding.pdf

EPIC Research Plans for 2015-2017

Applied Research and Development

- Strategic Objective 3. Develop Innovative Solutions to Increase the Market Penetration of Distributed Renewable and Advanced Generation.
- Strategic Objective 5. Reduce the Environmental and Public Health Impacts of Electricity Generation and Make the Electricity System Less Vulnerable to Climate Impacts.

Technology Demonstration and Deployment

- Strategic Objective 12. Overcome Barriers to Emerging Energy Efficiency and Demand-Side Management Solutions through Demonstrations in New and Existing Buildings
- Strategic Objective 13. Demonstrate and Evaluate Biomass to Energy Conversion Systems, Enabling Tools, and Deployment Strategies
- Strategic Objective 14. Taking Microgrids to the Next Level: Maximizing the Value to Customers

Regional Workshop Information

September 17, 2015. 10:00 a.m. — 12:00 p.m.

Elihu M Harris State Building, Room 2
1515 Clay Street
Oakland, CA 94612
Focus on solar and urban resources in the Bay Area.

September 21, 2015. 2:00 p.m. — 4:00 p.m.

City of Redding Community Room
777 Cypress Avenue
Redding CA, 96001
Focus on woody biomass in North State rural communities.

September 23, 2015. 2:00 p.m. — 4:00 p.m.

San Joaquin Valley Air Pollution Control District
1990 E Gettysburg Avenue
Fresno, CA 93726
Focus on Ag waste, dairies and solar in the Central Valley.

September 29, 2015. 9:30 a.m. — 11:30 a.m.

Norman F. Feldheym Central Library
Kellogg Room A/B
555 West 6th Street
San Bernardino, CA 92410
Focus on community solar in the San Bernardino Valley.

September 29, 2015. 2:30 p.m. — 4:30 p.m.

Victorville City Hall, Room D
14343 Civic Drive
Victorville, CA 92393
Focus on community solar in the High Desert region.

September 30, 2015. 10:00 a.m. — 12:00 p.m.

Bateman Hall, Room 1
1131 Ernestine Avenue,
Lynwood, CA 90262
Focus on solar and urban resources in the Los Angeles Area.

October 7, 2015. 10:00 a.m. — 12:00 p.m.

SANDAG Facility
401 B Street #800
San Diego, CA 92101
Focus on solar in the Southern California coastal region.

Some Renewable Energy Programs

Large array of statewide programs offering different types of funding & technical assistance

- CalRecycle Incentives for Businesses –
<http://www.calrecycle.ca.gov/Business/Incentives.htm/>
- California Alternative and Renewable Fuel and Vehicle Technology Program -
<http://www.energy.ca.gov/altfuels/>
- USDA Rural Development Grants –
<http://www.rd.usda.gov/ca>
- University of California Woody Biomass Utilization Group -
<http://ucanr.edu/sites/WoodyBiomass/>

*Information about additional incentive programs can be found at
<http://programs.dsireusa.org/system/program?state=CA>

The California Clean Energy Jobs Act – Proposition 39

- Up to \$550 million annually for energy projects such as energy efficiency upgrades and clean energy generation at schools.
- Roughly \$2.5 available from 2013 - 2018 to:
 - create clean energy jobs,
 - reduce greenhouse gas emissions, and
 - save energy and costs for schools.
- Includes accountability requirements to ensure funds deliver expected outcomes.

<http://www.energy.ca.gov/efficiency/proposition39/>

Enhanced Community Renewables Program

- California Public Utilities Commission (CPUC) and investor-owned utility program to enable access to ‘shared’ renewable energy projects
- Individuals can purchase a portion of an offsite renewable project (3 MW or less) and count it as their own
- Groups and communities can come together to benefit from shared renewable energy projects
 - Provide renewable energy to those that currently don’t have access
 - Leverage economies of scale to drive down costs vs rooftop systems

For more information:

Patrick Doherty, Analyst

CPUC Energy Division

PD1@cpuc.ca.gov

(415) 703-5032

Distribution Resource Plans (DRPs)

- Investor-Owned Utilities (like PG&E) are developing plans for incorporating more distributed energy resources
 - May include distributed and community-scale renewables, electric vehicles, energy efficiency, energy storage, and more...
- Aims to identify optimal locations to deploy projects to minimize the need for upgrades and benefit the electric grid
- May open up opportunities for communities and third-party developers to pursue projects
- More info at: <http://www.cpuc.ca.gov/PUC/energy/drp/>

Federal Level – US Clean Power Plan

- Announced by President Obama in August 2015
- Administered by US Environmental Protection Agency
- Aims to reduce carbon emissions from the power sector, and benefit communities

“EPA will encourage states to work with communities to include programs that will bring clean energy resources to communities as part of their state plans.”

Connect with the Energy Commission!

...and the Energy
Commission's listserves

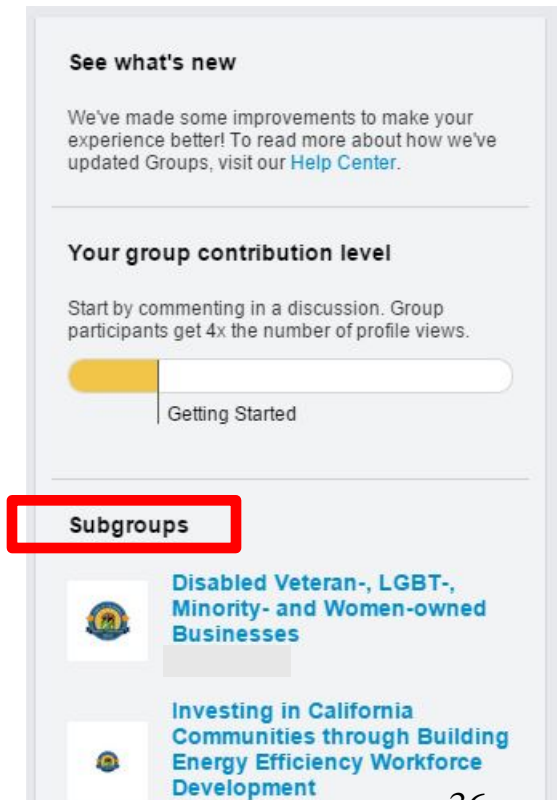

www.energy.ca.gov/research

Find Partners via LinkedIn

The Energy Commission has created a user-driven LinkedIn group page to help potential applicants **connect**, **collaborate** and **partner** on proposals for funding opportunities.

- Participants can join the “California Energy Commission Networking Hub” by:
 - Searching for the “California Energy Commission Networking Hub” group; or
 - Entering this link into your browser: (bit.ly/CalEnergyNetwork)
- Once there, find and join the desired solicitation subgroup.

Other Presentations

- 2:20 – 2:35 Case Study Presentation #1
 - Jonathan Kusel, Sierra Institute for Community and Environment
- 2:35 – 2:50 Case Study Presentation #2
 - Jim Zoellick, Schatz Energy Research Center
- 2:50 – 3:00 Utility Presentation on Community Programs
 - Armando Navarro, Pacific Gas and Electric (PG&E)

Public Questions and Answers

- Please state your name and affiliation as an introduction
- Please keep comments within 3-5 minutes to allow enough time for others

Thank you for participating!

Presentations and workshop information will be
posted to:
